```
=====
internal class Program{
    static void Main(string[] args)
    {
        mie indomie = new mie();
        indomie.jenis = "mie goreng";
        indomie.rebus();
    }
}

public class mie
{
    public string jenis;

    public void rebus()
    {
        System.Console.Write("merebus: "+ jenis);
    }
}
```

output:

merebus: mie goreng
